

PROFILE

Second-year **Full Stack Web Development student**, passionate about new technologies and self-directed learning. Detail-oriented and curious, with solid skills in both **front-end and back-end development**. Currently seeking an **internship** to apply my skills in practice and contribute effectively to real-world projects.

PROJECTS

• Personal Portfolio

Designed and developed a responsive personal website to showcase my skills, projects, and contact information. Features a modern design with smooth user experience and seamless integration.

<https://abderrahmane-portfolio-dev.vercel.app/>

• Park Smart

Developed an intelligent web application that allows users to easily find available parking spaces and reserve them online. Built with **React**, featuring an interactive map and a virtual ticketing system.

<https://park-smart-prototype.vercel.app/>

• Sales Pipeline CRM

Implemented a CRM system with a **Kanban-style sales pipeline** for managing B2B opportunities. Automated key metrics calculations, including weighted revenue, conversion rates, and risk opportunity detection.
